Doug Jenkins

Full-Stack Software engineer experienced in .NET, Python, Bootstrap, Docker, and other technologies.

Largo, Florida, United States

Summary

Extensively experienced and project-focused technical lead with a demonstrated track record of analyzing & developing applications for a variety of organizations. Proven expertise in communicating complex business solutions to clients, developers, and other project stakeholders. Talented leader who motivates and leads highly skilled software + functional teams to meet the project objectives and goals.

- Over 16 years of diverse software development and information system management experience.
- Extensive experience in designing, developing, and deploying Oracle Enterprise Performance Management (EPM) Software Suite of tools (HFM, Hyperion Planning, FDM, Essbase, DRM, HPCM)
- Outstanding communication and organization skills, working with clients, software developers, system engineers, and business leaders to understand & create complex business & software processes.
- Proficient in SQL Server (2008/2012), Oracle (10/11g), and Essbase database Platforms.
- Deep expertise in infrastructure and systems configuration for Oracle EPM products (Windows 2008/2012, Linux)
- Extensive technical experience in software development, VB.NET, Financial Accounting Systems, website development, & ETL technologies.
- Proven leadership and management skills for teams over 5 members.

Specialties: Software Development, Project Management, Visual Basic.net, Hyperion HFM, Hyperion Planning, Essbase, DRM, FDM, HPCM, SSIS, SQL Server, Oracle, Financial Management, Accounting.

Experience

MetLife

17 years 9 months

Principal Software Engineer

April 2015 - Present (10 years 1 month)

Tampa

- Lead the development and execution of several Oracle Hyperion EPM Deployments on several versions (11.1.2.4, 11.1.2.3, 11.1.2.2, 11.1.2.1, 11.1.1.3).
- Provide System Architecture and design for Hyperion EPM Infrastructure and system Automation. This integration provided a “lights-out” approach to all of the Hyperion EPM solutions globally.
- Possess expert knowledge of HFM, FDM, Hyperion Planning, Essbase, HPCM, DRM, and other EPM tools and technologies.
- Provide technical expertise and leadership to 5 - 10 Team members and consultants for our Hyperion Environment. I was responsible for project plans and task management of consultants with regular reporting of status to management.

Senior Software Development Engineer

April 2010 - April 2015 (5 years 1 month)

- Performed several upgrades from System 9.3.1, 11.1.1.3, 11.1.2.1, 11.1.2.2, and 11.1.2.3
- Led the development and implementation of Oracle Hyperion EPM System 11.1.2.2 for the Corporate Financial Consolidation process (HFM). This project included the rewrite of the existing HFM application (4 custom dimensions to 6) and implementing the Equity Pickup Module (EPU) for the new GAAP Application,
- Assisted in the design and development in the Budget/Forecast and Plan/Projection implementations of Hyperion Planning.
- Led the technical development and deployment of Hyperion Profit and Cost Management (HPCM) on the 11.1.2.3 version. This includes deployment, setup, configuration, and script development for automation.
- Designed and deployed several Financial Data Quality Management (FDM) Solutions in 11.1.1.3 and 11.1.2.2 with full automation of our ledger trails to HFM and Hyperion Planning.
- Provide technical expertise and leadership in developing automated Metadata management and consolidation tools for Oracle Hyperion Financial Management (HFM).

Systems Analyst

August 2007 - April 2010 (2 years 9 months)

- Led a distributed development team (on shore and offshore) using the SDLC as our common methodology.
- Provided project plans and developed project documentations (Charters, BRD, Tech Design, Test Plans, deployment plans, etc.) for projects developed on our team.
- Analyzed, Designed, and developed various ETL solutions from PeopleSoft ledgers to external reconciliation platforms using SSIS and SQL Server 2005 technologies
- Provided Business analysis of Complex Financial problems (Intercompany reconciliation, Check reconciliation) for the automated reconciliation platform, ReconPlus/Frontier.
- Assisted in SOX testing for supported applications.

Get Motivated Seminars, Inc.

Database Administrator / Business Analyst

March 2007 - June 2007 (4 months)

- Performed business analysis and requirements gathering for COSMOS CRM system replacement. This was an internal software program that managed customer orders, tickets, and client communications for over 2 million customers. Worked with business unit managers to develop requirements and scope documents for new system.
- Managed and maintained the corporate SQL servers including backups, data migrations, security, and optimization of 40+ databases for a total of 100GB of data.
- Performed data analysis for management. This included providing specific customer-trend data for a number of Ad-hoc report requests using SQL Server Reporting Services.
- Developed stored procedures, SQL script development, and DTS / SSIS package development for data loads and exports to 3rd party vendors and partners.

Web Piston

Chief Operating Officer

May 2002 - January 2007 (4 years 9 months)

- Directed financial management functions including development of monthly/quarterly financial statements, financial forecasts, and budgets.
- Oversee general accounting functions, including AR/AP, account reconciliation, and cash management. Administer all financial management systems, evaluating and integrating new applications.

- Worked closely with the CEO & other members of the management team to achieve established objectives. Interacted with the company's Advisory Board & outside auditors concerning financial reports & tax-related issues.
- Managed directly the technical support group to maintain high level of support and issue resolution.
- Managed directly various vendor relationships to maintain our costs within our budget and ensure high level of service.
- Managed directly all client relationships concerning our custom programming division to improve our sales & service goals.

WebPiston

Software Projects Manager

May 2002 - January 2007 (4 years 9 months)

- Directly overseen & managed over 80+ Development projects annually, delivering Internet-Based custom applications, informational websites, Content Management systems, & full-scale E-Commerce solutions. This included gathering Requirements, formulating solutions with the development team, and communicating project status and resolving issues with the client.
- Directly managed software developers, Q/A Analysts, Graphical Designers, and any 3rd party vendors, ensuring project delivery and maintaining the project scope within budget.
- Provided technical and strategic guidance to clients in terms of their website development, Online Marketing, and Search engine placement (SEO).
- Regularly assisted account reps in technical/requirements gathering for new/prospective clients & projects.

Rivergy / WebPiston

Software Developer/Analyst

April 2001 - October 2002 (1 year 7 months)

- Developed Middleware, Internet-based, and Data exchange applications using Microsoft Visual Basic, ASP, SQL Server and other Windows-based technologies.
- Worked with clients directly to gather requirements, produce deliverables, and deploy the final solution.
- Developed tools for E-Commerce clients to download financial data to QuickBooks via Intuit Interchange Format (IIF), CSV, and XML formats.
- Integrated various 3rd party software services such as UPS, FedEx, One World Distribution, and other procurement companies using CSV, Direct APIs, or XML Web Services.

Brown & Brown

Project Leader

May 1999 - April 2001 (2 years)

- Responsible for the development & Management of the AllenBrook Phoenix agency management system for the professional programs division. Managed Software developers, Business Analysts, and Q/A personnel to deliver Insurance product changes and new rating plans to the business group.
- Developed key management and executive reports using Oracle Reports & forms tools.
- Managed each divisions websites (protectorplan.com)
- Coordinated project status and requirements gathering between the business group, its business partners, and the software development team.
